Dominican Republic Study Abroad Capstone 2018

During the 2017-2018 academic year 15 students were involved in four different capstone projects whose objectives were to provide the national hydrologic agency of the Dominican Republic (INDRHI) with better reservoir forecasting and operational tools. These projects included using results from a global streamflow forecasting research project here at BYU to improve flood warning and prediction of reservoir inflows so that operational tools for improved irrigation management in the Yaque del Sur Basin.
