Program Overview

The City of Mesa’s Engineering Student Internship Program offers civil engineering majors the opportunity to gain practical experience and enhance professional development through hands-on application. The City's goal is to help each participant satisfy his or her professional interests. To ensure those interests are met, staff works closely with each student to devise a program rotation that allows for the exploration of several engineering disciplines within the City. Some of the areas the students will work in are, but not limited to:

- Engineering Design
- Construction Administration and Inspection
- Materials Testing Lab
- Surveying Department

Responsibilities

Students will have various responsibilities which may include:

- Utilize AutoCAD and other software for design and drafting
- Perform initial design and estimate for various projects.
- Review engineering and architectural drawings for conformance to standards
- Assist Engineering Construction with site inspections
- Research and create a variety of charts, forms and maps
- Develop interpersonal relationships with co-workers/supervisors and clients

Qualifications

- Currently enrolled in four-year accredited university or college
- Declared civil engineering major
- Minimum of 80 semester hours completed
- Minimum GPA of 2.8
- US citizen or proof of eligibility to work in the US
- Valid AZ driver’s license
- Proof of Arizona State Drivers Insurance
- Must meet all other applicable City of Mesa employment requirements
- Computer-aided drafting (CAD) experience is desirable

Duration

- The internship will last a maximum of 1,040 hours. It is anticipated the intern will work 20 hours or more per week.
- Students will be compensated approximately $14.49 per hour.
