ATTENTION: Engineering Interns & Licensed PE

REFERENCE: Structural Engineering Position
Sandy, Utah

L.R. Nelson Consulting Engineers, LLC has a Project Engineer position available in structural design. Job responsibilities include design and detailing of commercial and residential structures of light frame, masonry, concrete and steel construction. The Project Engineer will assist present staff engineers as needed. Qualified persons may be given project management responsibilities as appropriate to their individual skills.

Qualifying candidate will have obtained their engineering intern status or be a licensed professional engineer registered in the State of Utah. Successful candidates will have solid understanding of basic structural analysis, familiarity with general structural analysis programs, and basic computer aided drafting skills. Wood, concrete and steel design capabilities are a must.

Interested persons should send a resume via email or fax to the contact listed below.
