Civil Engineering Internship

Excel Engineering has an exciting opportunity for a paid, part-time civil engineering internship beginning in January 2016. Excel Engineering is a civil engineering firm specializing in commercial and residential land development design. Excel Engineering is located in American Fork, Utah. Applicants should be good students and have completed the CEEn 112 course involving engineering drafting.

Duties will include assisting project managers on multiple projects, drafting, and designing of land development projects. Available work hours are 10-20/week. Please submit your resume to david@excelcivil.com
