ATTENTION: Civil Engineering Students

REFERENCE: Structural Engineering EI Position
Sandy, Utah

L. R. Nelson Consulting Engineers, LLC has a structural engineering EI position available. Job responsibilities include assisting staff engineers with design and detailing of commercial and residential structures of light frame, masonry, concrete and steel construction.

Qualifying student will be a graduate engineering student with emphasis in structural engineering. Preferred candidates have desire to remain in the Salt Lake City area to work after graduation. Successful candidates will have solid understanding of statics, strength of materials, basic structural analysis, familiarity with general structural analysis programs, and basic computer aided drafting skills. Must also be knowledgeable in the use of Microsoft Office and Microsoft Excel. A basic knowledge of wood design is preferred but not required. Concrete and steel design capabilities are a must.

Interested students should send a resume via email or fax to the contact listed below.

Send resumes to:
